EUROVOLC Etna Summer School 2019 “Understanding sub-surface volcanic processes” in Linguaglossa (Catania, Italy), 2-6 September 2019

Date:
Monday, July 29, 2019 - 15:15

As part of the H2020 EUROVOLC project (European Network of Observatories and Research Infrastructures for Volcanology), the Etna Summer School entitled "Understanding sub-surface volcanic processes" will be held from 2nd to 6th September 2019 in Linguaglossa (Catania, Italy).

The school in Linguaglossa, on the shoulders of Mount Etna, is mainly aimed at PhD and post-doctoral students.

The students will be introduced to multi-parametric modelling, data analysis and interpretation, and modelling of the sub-surface volcano dynamics.

The school includes 2 days of frontal lessons, 1 day of excursion on Mount Etna visiting the multi-parametric monitoring stations, and 2 days of practical activities by the students in analyzing, processing and interpreting real data from Mount Etna.

Further information about the topics and the applications can be found at eurovolc.eu.
