

GNSS DATA AND PRODUCTS

Jan 18

1st EPOS TCS GNSS Webinar, 18-19 January 2021

Monday, January 18, 2021 to Tuesday, January 19, 2021

Location:
webinar

The EPOS (European Plate Observing System) GNSS Data & Products Thematic Core Services group is hosting a live webinar on January 2021, 18 (Monday) and 19 (Tuesday) starting at 13:00 UTC.

The webinar will present how to benefit from the GNSS data & products from European stations using dedicated software & webservice.

Learn how to discover and integrate GNSS data & products for thousands of stations in your science by using dedicated tools based on an integrated software platform developed by the community - GLASS.

The webinar, will explain the following main topics:

- how the services provided by the EPOS-GNSS TCS can help the geodetic and geophysical users.
- how the data from National and Regional GNSS networks can be integrated, validated and disseminated

through EPOS-GNSS.

More information about EPOS-GNSS is available at: <https://gnss-epos.eu/>

In the EPOS website <https://www.epos-eu.org/tcs/gnss-data-and-products>
