

Dec 01

EPOS Italia online Workshop on Earthquake Hazard, 1-3 December 2020

Tuesday, December 1, 2020 to Thursday, December 3, 2020

Location:

virtual workshop

The **workshop on Earthquake Hazard** is promoted and supported by the [Joint Research Unit EPOS-ITALIA](#). It will take place on December 1-3 2020 and will be delivered as an online event.

The main goal of the workshop is to stimulate the interaction and collaboration between leading experts of the Italian scientific community and to promote the discussion on all aspects related to earthquake hazard analysis.

The event is structured in 6 thematic sessions (a.k.a. working groups) of about two hours each. During each session, people can openly contribute portraying the state of the art, discussing existing and under development methodological approaches, sharing data, opinions, concerns and future perspective.

Coordinator: Istituto Nazionale di Oceanografia e Geofisica Sperimentale (OGS)

Partner: Università di Genova

Registration and Access

Access to workshop is granted previous user registration. After registration, the user will have full access to online sessions, the discussion forums and the data sharing area.

You can register or login [here](#).

Language

The workshop will be held in Italian. All the participant are encouraged to participate at the Round Table.
