January 2018 | Highlights 01

During its last meeting, held in Berlin (Germany) on December 14th – 15th 2017, the EPOS Board of Governmental Representatives (BGR) has approved the STEP 2 submission of EPOS-ERIC (European Research Infrastructure Consortium) to the European Commission.

The twenty BGR Delegates attending the meeting unanimously approved the EPOS-ERIC Statutes and the Scientific and Technical Description, giving the green light to the submission of the final step for the EPOS-ERIC legal establishment.

This achievement is of paramount importance for EPOS demonstrating the successful progress in its implementation phase and paving the way toward the construction of this novel pan-European Research Infrastructure for solid Earth science.
